*Fixing Services*

# **FILM CREW** **FIXING SERVICES**

One of the most important factors to consider for your television or film project is the location.

Our team is on hand to provide full location management services for incoming television and film crews. We will find you the best locations, take care of film permits, import waivers, transport, accommodation, translation and specialised guiding services.

Safari Vibes will take the stress out of your Ugandan location film work, we are ready and waiting to help your project succeed!

- Fluent in local languages for full translations
- Extensive local knowledge to help you find the perfect location, props and crew
- Permits and paperwork managed ahead of time - saving precious time and resources
- Quality past experience of film fixing
- Logistics are our strength with an experienced crew
- Range of vehicles to choose from to suit all eventualities
- Top notch chefs ready to feed you throughout the day
- Full costings available up front to help you budget
- Full army of "men on the ground" to cope with any cultural and local mishaps that may arise
- No matter how remote - we can make it happen!

## **OUR PASSION AND EXPERIENCE**

We are passionate about Africa and are very proud of our reputation for respecting the local wildlife and people. Many years of “film fixing” experience combined with our ability to speak the languages and our in depth local knowledge, we have gained trust and respect. This unique level of trust secures the access and safety of film crews that we introduce to the region and ensures top quality sites and insights in even the most remote settings.

We manage filming access across the breadth of many settings – from iconic landmarks and cultural gems, through to the most remote settings - we can help.

Our committed, creative team negotiates across all control requirements, from filming permits, road blocks, land access and border controls.
